TUFF STUFF

polyurethane is available in standard and optional custom colors; ask your Rhino Linings dealer for details. Linings can be sprayed to any desired thickness.

TUFF STUFF® POLYURETHANE TECHNICAL SPECIFICATIONS

PROPERTY	ASTM METHOD	RESULTS
Hardness	D-2240	85 ± 5 Shore A
Tensile Strength	D-412	1700-1900 psi
Elongation	D-412	325-375%
Tear Resistance	D-624	140-150 pli
Water Absorption	D-570	≤ 1.5%
General Chemical Resistance*	Excellent	
Temperature Extremes — maintains most characteristics even in extreme weather conditions.		
Adheres effectively to steel, aluminum, fiberglass, wood, concrete and most substrates.		
Rhino Linings' proprietary chemical formula and spray equipment yield a protective surface unlike any available on the market today. *See your dealer for details.		

RHINO LININGS VS. OTHER COATINGS...

	SPRAYED-ON RHINO LININGS	PAINT-LIKE COATINGS
Watertight Seal to Boat or Trailer Prevents Rust and Corrosion	YES	NO
Resists Scratches and Abrasions	YES	NO
Contour Fit Insulates Boat or Trailer from Noise and Road Vibrations	YES	NO
Will Not Crack, Split, or Warp	YES	N/A
Virtually No Loss of Space	YES	YES
Maintenance-Free: No Waxing, Repainting, or Screws to Tighten	YES	NO
Textured, Flexible Surface Reduces Load Slippage	YES	N/A
In the Event of an Accident, Surface is Repairable	YES	YES
Available in Any Color	YES	YES

MARINE APPLICATIONS

- SKI BOATS
- FISHING BOATS
- SKIFFS
- COMMERCIAL VESSELS
- SAILBOATS

THE SPRAYED-ON UTE LINER

Rhino Linings® is the worldwide leader in sprayed-on polyurethane linings for utes, boats and trailers.

For more than 15 years, Rhino Linings' TUFF STUFF® polyurethane has been providing marine vessels with a thick layer of protection under the most rugged conditions. The unique flexible and textured surface reduces slippage* and will not crack, warp or peel even under temperature extremes.

Sprayed to any desired thickness, TUFF STUFF polyurethane forms a permanent airtight and watertight seal when sprayed directly onto the trailer or boat surface.

BENEFITS OF RHINO LININGS

- Protects the boat and trailer from the corrosive effects of harsh weather, salt and rust
- Forms an airtight and watertight seal, preventing rust and corrosion
- Will not crack, split, tear or warp like rubber mats or wood floors
- Fully covers wood, metal or fiberglass surfaces
- Increases the resale value of the boat or trailer
- Maintenance-free, easy-to-clean; no more waxing, sanding, repainting or tightening of screws
- Helps insulate the vessel from noise and vibration
- Solvent-free material becomes a solid in minutes
- Environmentally-friendly and not readily combustible
- Easily accommodates all types and sizes of marine vessels
- Available in virtually any color

Rhino Linings®
THE SPRAYED-ON UTE LINER

Rhino Linings' TUFF STUFF provides a thick layer of protection, even under rugged conditions. And, the unique flexible, textured surface reduces slippage above or below decks.*

It can be applied to new boats or to crafts that have already been launched. Because it permanently seals out water and inhibits corrosion, its uses are virtually limitless.

The textured surface can help reduce slippage on decks, gangways, walkways* and more!

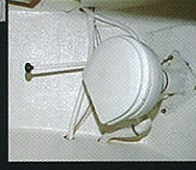

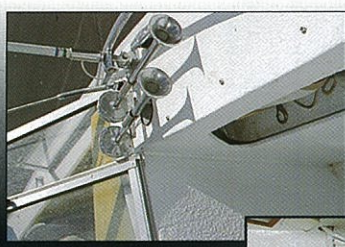

The thick, permanent layer of TUFF STUFF polyurethane works well on either side of popular small aluminum skiffs or runabouts. It can help stop leaks and punctures.

Rugged enough for a variety of hard-working applications, Rhino Linings performs well in work and storage areas of all sizes.

Above or below decks, equipment bolts right back into position after the application of Rhino Linings. Compressing the thick rubber-like surface helps lock the bolts in place while helping to permanently seal out moisture.

Not a paint-like coating, TUFF STUFF provides a tough industrial-grade protective lining for virtually hundreds of different vehicle and marine applications.

Even dock boxes and trailers can take advantage of Rhino Linings' rugged, long-term durability.

* CAUTION: Wet and oily surfaces are always hazardous regardless of the type of surface treatment.
